

OF ADDITIONAL

DIBAKAR PAL ¹

¹ RETIRED EXECUTIVE MAGISTRATE (CIVIL SERVANT) & PHD STUDENT, DEPARTMENT OF BUSINESS MANAGEMENT, UNIVERSITY OF CALCUTTA, INDIA.

ABSTRACT:

Some companies offer perks, to their employees, which are more than salary. This additional income confirms the loyalty of the employees and more production in return. Also the employees have not to pay income tax, since perks are not income just like compensation. Such a company considers it more profitable to pay additional finance to its employees rather paying additional income tax to the government. It is their additional investment with additional income.

KEYWORDS:

ADDITIONAL, ADDED, EXTRA, SUPPLEMENTARY, SURPLUS.

INTRODUCTION

Creative writing is based more on manifestation rather than on expression. It does not inform rather reveals, so this style of writing bears no reference. The best creative writing is critical, and the best critical writing is creative. The present article is the outcome of creative writing meant for lay readers. As such free style is the methodology adopted so that pleasure of reading can be enjoyed by the common mass. As you may know Francis Bacon (1561-1626), the immortal essayist, wrote many essays and notably, "Of Love", "Of Friendship", "Of Ambition", "Of Studies", etc. The myriad-minded genius rightly pointed out that all the words of the dictionary can be the themes of essays one can write. But little has been done, in this regard since his death, in order to finish his unfinished monumental works. In fact Bacon's way of presentation i.e., his unique style kindled the imagination already in me and encouraged me as well to write essays, in the light of creative writing, thus to get relief through Catharsis.

ARTICLE

Additional means added. It implies extra e.g. additional resources/funds/security. It is supplementary e.g. additional information. Further example: There will be a small additional charges. The government is providing an additional \$30 million to expand the service. Additionally, a shuttle service will run on Sundays from 8 am to 5 pm.

Additional is not surplus. Additional is known since it is given upon intimation. But surplus can be known after verification. Additional is within knowledge. Surplus is

beyond knowledge. Thus all surpluses are additional, but all additional may not be surplus. Both are extra. Both are like extra players and kept for waiting for engagement whenever and wherever required.

In crisis period an additional person or thing is valued much since it saves the person in danger thereby saves the situation and serves the purpose as well. Thus the value of additional is perceived only in need. An intelligent person, as such, always thinks for additional and keeps additional person or thing accordingly as per demand of the situation.

There may be two situations either exact or additional. Exact amount causes tension. There remains no room for exchange or replacement. Then the whole project may be quite frustrated. To overcome this problem, additional question papers and answer scripts are kept in the examination venue which is a time bound program. Similarly, election is also a time bound program. So sufficient additional persons and things are kept and preserved meticulously to overcome the political crisis. A passenger if carries the exact fare and unfortunately if a single penny is lost then he cannot avail the vehicle for journey.

In any reservation counter for the convenience of counting exact amount of money is asked to pay. An intelligent person pays exact amount to avoid the return denomination of the additional amount of money thus paid. The return denomination has three outcomes i.e. exact, less and more. In case of the later two cases altercation thereby additional problem may arise causing wastage of both energy and time as well.

Additional persons are engaged to assist the senior. It may

not possible to set up a new establishment. The additional officers must coordinate with the boss otherwise there will be chaos rather than helping the boss. To avoid this boss does his own duty alone. But in case of huge load it is next to impossible.

The additional person if be callous then there will be additional problem. If the person becomes a conspirator then it creates another additional difficult problem. If the subordinate be more talented then it offers extra dimension on it. In case of persons engaged there may be two outcomes viz., either the subordinate may be faithful or he may gather others to dethrone the boss. As such selection of employees is very important.

In case of nepotism appointment is given to the concerned candidate who was selected already. In such a case interview is merely a farce and an eye wash only. In contrast, when interview is fair and free then none knows who will get the assignment. Then appointment is given not to the concerned candidate rather to the candidate concerned. Thus, "concerned candidate" and "candidate concerned" are two clues of the appointment disclosing either practice or mal-practice.

Additional offers advantage at the cost of expenditure. A judicious person considers both advantage and cost before taking any decision. Additional cow is kept to continue the cultivation. Additional is to cover the risk just like extra money during travelling.

Someone gets sufficient additional, someone gets little and someone gets not at all. It depends on lobby and luck. If income is just equal to expenditure then there lies the tension round the clock for the known and unknown problems likely to appear.

There may be some additional employees. If they are not engaged for long and paid regularly then they may be afraid of losing the job. Generally, a worker works and expects his earning regularly in time. It is quite unusual that payment without any toil. These idle brains either may love or hate each other. The boss hates the additional employee who quarrels with each other to get favour and proving self-superiority than his colleagues though they are equal and at par in the eye of law.

Man considers all his belongings as essential. He is envious of the fortune of others. He considers other's asset as additional and his own as minimum. He is not happy what he has. He hankers after more additional assets. The more the merrier. He enjoys holding instincts with all his belongings.

In case of ship-wreck man throws half of his goods in the sea to save his own life from the imminent danger. Even,

he has to throw all his belongings in the water just to save him from drowning. Thus man realizes that his life is superior to his assets who become liability in crisis. So, asset sometimes becomes liability. Thus essential becomes additional.

A person may have many friends and followers. If one is allowed for entry then he goes alone leaving all his near and dear ones who become instant additional at that moment. Sometimes he may allow the dearest one to go. It is a risky decision. Other followers may rebel. If more persons are allowed, then the selection process depends on the secret gradation list done already.

Gradation list is an outcome of daily experience and a critical task performed by the brain through innovative and unique mechanism. This list remains hidden in his memory. The selection process may suffer from nepotism. Also there may be no compromise with quality. It depends on the strategy of the concerned person. Man suffers from illusion. He may have over-estimation or under-estimation of self. Then one can understand his demand and real status as well, when hard reality is faced with.

A bad student reads little. He considers other lessons as additional. In contrast a good student reads first page to last page and takes additional subject for his enrichment. This additional labour prizes him and paves his future success.

Problem arises when additional cost exceeds actual cost. It really becomes burden when interest exceeds principle. Additional is small but becomes big as time passes. So, time is a crucial factor like cancer that spreads very quickly. In mathematics multiplication is a big addition.

Some companies offer perks, to their employees, which are more than salary. This additional income confirms the loyalty of the employees and more production in return. Also the employees have not to pay income tax, since perks are not income just like compensation. Such a company considers it more profitable to pay additional finance to its employees rather paying additional income tax to the government. It is their additional investment with additional income.

Additional is good if favours and bad if not. It is good if not to pay or unconditional. As such, employed son is prize, unemployed son is additional burden.

Man is a social being. He is bound to help. Also he is bound to take help from others in need or danger. Thus man willy-nilly helps and takes help from others. Yet, help or assistance from others is not good. Then there remains the question of reciprocation. A Good Samaritan does not expect return. He helps out of good wishes.

One should not help others if not asked. Then help remains unevaluated. But someone helps with the intention of return. He considers it as investment. However whether one expects return or not it matters little. A sensible person considers it as an additional mental burden that drives him to repay and thereby be free of obligation.

A wise person tries to be self-dependent. He declines to take help from others thinking future consequences. Even if he takes help he immediately tries to repay either by cash or kind thus to remain free from additional thought of repayment. His life is already over-burdened with various cares and anxieties. As such he wants not to be overburdened further rendering his life miserable more.

CONCLUSION

Weak and lazy persons depend on others. Dependence is alias and akin to reciprocation. That is a burden. So, motto should be to help others in distress but without expecting any return. This hope of return becomes a burden that causes one melancholy or angry if not received. Thus expectation is a burden. Also obligation is a burden. The former is negative and the later one is positive in nature. Burden of any kind is an additional problem that is a hindrance for moving forward.
