

OF RIVER, THE MOTHER OF MANKIND

DIBAKAR PAL ¹

¹ PHD STUDENT IN INDIA.

ABSTRACT

The source and subsequent course of river is natural. Nature is a great mathematician. Every work of nature is the outcome of much calculation considering various parameters. As such nature has done no harm to the civilization. Rather man has done against nature causing danger to both creator and creation as well. Nature exists on balance. Now, when man diverts the course of river, nature suffers from imbalance causing natural calamities viz., flood, drought, etc.

KEYWORDS: RIVER, FLOOD, DROUGHT, NATURAL CALAMITIES, GLOBAL WARMING.

INTRODUCTION

Creative writing is based more on manifestation rather than on expression. It does not inform rather reveals, so it bears no reference. The best creative writing is critical, and the best critical writing is creative. The present article is the outcome of creative writing meant for lay readers. As such free style is the methodology adopted so that the pleasure of reading can be enjoyed by the common mass. As you know well that, Francis Bacon (1561-1626), the immortal writer, wrote many essays, and notably "Of Love", "Of Friendship", "Of Ambition", "Of Studies", etc. The myriad-minded genius rightly pointed out that all the words of the dictionary can be the themes of essays one can write. But little has been done, in this regard since his death, in order to finish his unfinished monumental works. In fact Bacon's way of presentation and his unique style kindled imagination and inspired me to write essays, in the light of creative writing, thus to get relief through Catharsis.

ARTICLE

Nature is not responsible for natural calamities; rather human callousness is solely liable for this misfortune. Global warming is the worst threat to the civilization. Still now if man be not careful about its cause then utter ruin is a must. River course is changed due to the hindrance caused by man causing one of the causes of flood. In fact nature is calm by nature. It does not disturb man but if it be disturbed it takes revenge. El Nino episodes affect weather over a large area. They have been linked to droughts in Indonesia and Australia where vegetation becomes so dry that the smallest spark can ignite it. The result is a fierce bush fire. During a La Nina episode, trade winds strengthen and warm surface water accumulates in a deep pool near Asia. Rainfall follows the warm water, bringing heavy rain to parts of Australia and Indonesia. Hurricanes are the outcomes of La Nina. It is not known how the El Nino-Southern Oscillation (ENSO) Cycle will be affected if the global climate grows warmer.

The source and subsequent course of river is natural.

Nature is a great mathematician.

Every work of nature is the outcome of much calculation considering various parameters.

As such nature has done no harm to the civilization. Rather man has done against nature causing danger to both creator and creation as well. Nature exists on balance. Now, when man diverts the course of river, nature suffers from imbalance causing natural calamities viz., flood, drought, etc. So, man should know first the calculation of nature. Then before any intervention in nature's system man must know the nature's rule. Otherwise man's whims will bring utter ruin. Nature may change the course of river and it also takes subsequent measure accordingly for its ecological equilibrium. But whenever man whimsically changes the direction of river nature takes revenge. As such better it is not to disturb the course of river rather follow the direction of nature to save the civilization. If man needs to divert the course of river then it must analyze the data very meticulously of course and flow of river at least for one hundred years. Then man will make a sample test before administering the master project. This is the essence of this research works.

Flood is natural phenomena. An animal vomits when stomach rebels and does not want the food it takes. Similarly, river bed does not accept the water that is supplied by the source. It sends water to its bank and adjoining places as per volume of water it receives.

River banks are submerged. It enhances fertility of the soil and produces more crops. If civilization is submerged underwater then river can't be held responsible rather civilization is the trespassers. Dazing is not the solution of flood, rather through dazing a flood is replaced by another flood.

Drought occurs in absence of water and trees. These two are complimentary to each other. Where there is water there is tree and vice versa. If trees are destroyed without plantation then cloud will not come down to the forest that is no more in existence. Tree protects the nature from soil

erosion. It offers fruit, shade and shelter to the birds, beasts, insects, etc. thus to maintain temperature, weather and ecological balance at large.

CONCLUSIONS

River also helps for cheap transport. In absence of river man has to face uncertainty.

Tremendous heat caused by nuclear explosion changes the weather and is liable for global warming the most dangerous threat that will cause utter and untimely ruin of the civilization, as well.

ABOUT THE AUTHOR

Pal, Dibakar is a Retired Executive Magistrate in India and PhD Student. Though he is a Civil Servant yet he is genuinely interested in diversified academic fields. As such, he holds master degrees in M.Sc(Math), M.A(English), M.A(Bengali), M.B.A(HRD), M.C.A, P.G.D.M.M(Marketing), L.L.B, D.C.E(Creative Writing), M. Phil (Business Management),UGC- NET(Management)-2008. He attended an International Conference at IIT, Mumbai, India and five International Conferences at U.S.A; though he gets invitation to present papers in many International Conferences at home and abroad round the year. He presents papers on Computer Science, Management, English Literature, Linguistic, Philosophy, Philology, Psychology, Sociology, Humanities and Poems. He presented a paper on Computer Science and Chaired in 2007 IEEE Conference at Richmond, Virginia, U.S.A. Also another paper on Fuzzy Logic was accepted by IEEE Conference 2010 at USA. He serves as Session Chair, Presider and Reviewer. He serves as reviewer of American Marketing Association, Journal of Common Ground; Australia, IEEE Transactions, IJEAPS, AJHC, Journal of Supercomputing.

He has more than two hundred ten (210) publications and among these one is as Monograph in International Journal on Management Science, one Monograph is in Journal of the World Universities Forum, one is in Consumer Behavior, two are in Computer Science, one is in Neuroscience, one is in Linguistic and rests are Creative Writing of English Literature. In Creative Writing two papers have been incorporated in SSRN's Top Ten Download List three times in November, December 2010 and April 2011. In ResearchGate his papers have reached a milestone through more than 130000 reads. Scholars' Press and Lambert Academic Publishing House, Germany have published twelve books between the months July to December, 2016. New Texas, A Journal of Literature and Culture, Sul Ross State University, Alpine, Texas, USA has published ten essays in February 2018. International Educational Scientific Research Journal (E-ISSN : 2455-295X) and Research Chronicle & Research Innovator (ISSN: 2347-503X; 2348-7674) publish Creative Nonfictions every month regularly. Now he is pursuing his PhD thesis in Business Management in University of Calcutta, India. Also he is currently focussed on the Extension Works of Huffman Code i.e., Coding Theory and Pattern Recognition through Fuzzy Logic (Pattern

Recognition, Image Processing, etc) of Computer Science.

His hobby is Creative Writing (Nonfiction). He says:

Creative writing is based more on manifestation rather than on expression. It does not inform rather it reveals, so it bears no reference. The best creative writing is critical, and the best critical writing is creative. As you know well that, Francis Bacon (1561-1626), the immortal writer, wrote many essays, and notably "Of Love", "Of Friendship", "Of Ambition", "Of Studies", etc. The myriad-minded genius rightly pointed out that all the words of the dictionary can be the themes of essays one can write. But little has been done, in this regard since his death, in order to finish his unfinished monumental works. In fact Bacon's way of presentation and his unique style kindled imagination and inspired me to write essays, in the light of creative writing, thus to get relief through Catharsis.
