Source: Annual Report on Tnpl

INTERPRETATION

It was clear from the above analysis that the company's working capital turnover ratio is not bad. The working capital also goes on decreasing during the period of 2021 which will increase the working capital turnover ratio to a higher level. High ratio indicates the good profit. But decreasing flow of study period.

1.7 FINDING&CONCLUSION

FINDING:

- The net working capital position of the Tamil Nādu News Print paper ltd shows and effective utilization of working capital.
- Current ratio during the year 2020-21 to 2021-22 is satisfactory but during the study period the ratio is lower than the normal ratio. (2:1)
- Liquidity ratio during the study period is satisfactory because it is higher than the normal ratio this shows the financial of the TNPL.

SUGGESTION:

- The net working capital position of the Tamil Nādu News Print paper ltd shows and effective utilization of working capital.
- Current ratio during the year 2020-21 to 2021-22 is satisfactory but during the study period the ratio is lower than the normal ratio. (2:1)
- Liquidity ratio during the study period is satisfactory because it is higher than the normal ratio this shows the financial of the TNPL.

CONCLUSION:

From this report, we able to know about each and every function of the department of this organization, it is obvious that it has more efficiency and also able to survive in this field. The company is now planning to improve its efficiency by having fully fledged equipment and modern technology to enrich their overall functions. This organization may use computer which is one of the most wonderful inventions of the centenary will also help this organization to have link with its development in feature.
